Professional Engineer

We are currently seeking a professional engineer to provide forensic engineering consulting services for our clients in the insurance and legal arenas. Our focus is on cause and origin investigations related to electrical and electro-mechanical equipment failures.

Job Duties and Responsibilities:

- Responsibilities will include fire origin & cause investigations.
- Conduct detailed failure analysis examinations on electrical and electro-mechanical equipment.
- Perform site inspections related to power transmission/distribution, lightning damage, electrical shock, electrical arc flash, equipment grounding, etc.
- Research replacement cost versus repair solutions.

Job Requirements:

- Candidate must have a PE license and a minimum of five (5) years work experience in a technical field and diversified knowledge of multiple electrical or mechanical disciplines.
- CFEI or CFI certification is desired.
- Possess strong oral and written communication skills to interact with clients and submit detailed reports.

Please no phone calls or agency submissions | We are an Equal Opportunity Employer!
